

PRODUCT INFORMATION

PRODUCT NO AD434 - LOW VISCOSITY CONTACT ADHESIVE

AD434 is a polychloroprene based contact adhesive which is suitable for bonding wood metal, leather, rubber, melamine laminate and ceramics. The resultant bond is durable and resistant to both heat and water.

TYPICAL PROPERTIES

Composition	-	Polychloroprene based contact adhesive
Physical Form	-	Brushable Liquid
Specific Gravity	-	0.89

APPLICATION

Do not thin. Apply only to clean dry surfaces. After stirring, apply to both surfaces and allow to dry for at least 10 minutes. Press surfaces together using as much pressure as possible to ensure fusion of the adhesive. Bonds may be made up to 60 minutes after adhesive is dry on porous surfaces.

Coverage is dependent on porosity but as a guide approximately 3m²/litre is reasonable.

Tools and equipment may be cleaned with DRC Polymer Products Ltd cleaner AD436.

STORAGE AND SHELF LIFE

AD434 has a shelf life of 12 months when stored in its sealed container between 5°C and 30°C in a dry area under cover.

HEALTH AND SAFETY REGULATIONS

For further information, please consult the relevant DRC Polymer Products Ltd Product Hazard Information sheet.
